

ADDIE Learning Objective: Three-Column Chart

Instructional Objective	Teaching Methods	Teaching Methods
Students will be able to describe the ADDIE model of instructional design, each element of the model, and how the elements interact with each other.	After a short lecture on the ADDIE model, students will be assigned to pairs and be asked to describe the model to each other.	<p>Students will be given a 10-item quiz.</p> <p>Students will be asked on an exam to draw the ADDIE model, label each element, and describe how the various parts of the model interact with each other.</p>
